# CRYSTALINE

DESIGNED BY KONSTANTIN GRČIĆ

Crystalline is the first and only High Pressure Laminate manufactured by embedding SWAROVSKI ELEMENTS in its surface. Notwithstanding the high pressure (90 kg/cm<sup>2</sup>) and temperature (150°C) of the manufacturing process, the crystals are not shattered or altered thanks to a revolutionary manufacturing technology developed by the R&D Department at ABET LAMINATI.

The architect and designer Konstantin Grčić has created 3 exclusive designs for the Crystalline collection. The crystals morph, on Black or White backdrops, from the pure lines of "Ray" to the exquisitely simple geometry of "Peak", to the firmament of lights of "Bling".

The symbiosis of a groundbreaking manufacturing process and the incredible brilliance of SWAROVSKI ELEMENTS creates this exquisite and refined collection. Each panel of Crystalline is as unique as are SWAROVSKI ELEMENTS.

With the Crystalline collection, ABET LAMINATI and Konstantin Grčić offer luxurious alternatives for decoration and interior design.

**Crystalline sheet size: 2440 x 1220 x 1.2mm**
